

Jewish Interactive – Computing Club Facilitators

Jewish Interactive is an innovative registered educational charity and we are hiring Computing Club facilitators to run after school clubs at least one afternoon a week in primary schools around NW London. This is a fantastic opportunity to earn money, whilst getting experience working with a tech start up, schools and improving kid's skills.

The clubs run after school for an hour from approx. 4-5 pm. All teachers would need to be at the school at least 15 minutes before the club starts to ensure that they are ready to start teaching on time. The start of the clubs vary and we are able to try and accommodate clubs to your location and schedule where possible.

Ji's Computing Clubs teach children in years 3 – 6 (ages 7 – 11) important coding skills to help them further their interest and understanding in the subject.

We are looking for facilitators that are **flexible, reliable, punctual** and **enthusiastic**. No previous teaching or coding skills needed but are preferred. DBS and Safeguarding required and can be organised through Ji.

Applicants must be at least 18 years old to apply

Pay: £30 per club

Please send a CV to liat@jewishinteractive.net
